

Amendments to the Specification:

Please amend paragraphs **[0004]** per the following:

**[0004]** US 4 974 711 A describes the control of the brake and the clutch of a lawn mower. In view of the considerably smaller moment of inertia of the knives of the lawn mower, anyone skilled in the art cannot see a reason for the use of this control for an agricultural harvesting machine of the type described initially from this publication.
